

# Presentation Evaluation

Presenting Group Members: \_\_\_\_\_

Presentation topic: \_\_\_\_\_

This evaluation is for: \_\_\_\_\_

Date: \_\_\_\_\_

1. Explanation of the **problem/main topic** of the presentation. \_\_\_\_\_/15

(The topic or purpose of the talk is clearly explained. I understood the main idea of the problem (not the solution)).

2. Explanation of the **main results** (meat of the talk). \_\_\_\_\_/25

(The main results/observations/takeaways are clearly highlighted and emphasized).

3. **Organization** of the talk and the **presentation style** \_\_\_\_\_/15

(Various sections/subpoints are well organized. More importantly, various aspects of the problem are nicely linked. There is a clear flow. Presenters worked well to share their work in an educating manner. If there were slides, they were nicely put together. If they used white board, then they did a good job)

4. **Group work** \_\_\_\_\_/10

(Both members of the group put in the work. It is clear this has been a group effort).

5. **Question Answers/ Discussion** \_\_\_\_\_/15

(The questions asked were well responded. Remember, it does not mean that presenter has an answer to every question. It just means that presenter shared his thoughts on the comment/question in an intelligent and informative way.)

6. **Overall learning** \_\_\_\_\_/20

(I learned something new from this talk, or I am able to understand the topic(s) discussed in the class well. This talk has been a good learning experience in the context of the course.)

The overall score is (sum all the above values) \_\_\_\_\_ / 100

(Optional) Any comments ....

(Note: You **MUST NOT** share any part of this evaluation with any other person at any stage.)
